A Steamer Burned and 500 Coolies Roasted Alive.

San Francisco, June 12. Details have been received of the total destruction of the Peruvian ship Don Juan by fire at sea. It is supposed she was set on fire by the Coolles who were entrapped on board at Maccarud. The steamer's crow abandoned the vessel, with M50 Coolies fastened under the hatches. Five hundred of the Coolies were roasted alive. The others escaped when the hatches burned off. She was an Ameriican built ship, sold to the Company Maratina de Peru, of San Francisco, chris-tened the Dolores Quanta, was filled out here for the Coolie trade, and had return-ed here several times for supplies, while

The son, who was driving, was dragged nearly a quarter of a mile, and killed. Mrs. Battle, it appears, jumped from the wagon and was killed, and the infant died soon after, and Mr. Battle was thrown out and crushed to death by the wagon.

A similar accident occurred near Louisville, Lincoln county, Missouri, on last Sunday. David Stewart and his wife, while driving to church, were thrown from their carriage, and Mrs. Stewart was instantly killed, and Mr. Stewart fatally injured.

The Growth of London. The census of London, just taken shows a population of 3,247,331 within the census limit; that is to say, within a circle of six miles radius, whose census is Charing Cross. The population of treatment of the same district in 1861 was 2,803,989. Th increase in ten years was 443,642, or more than the whole population of Brooklyn, Manchester or Naples. Paris and New York are the second and third in size of the cities of the world, but London is now much larger than Paris and New York

together.

In comparing the census returns of cities, however, it is important to bear in mind the areas from which the returns are made. The metropolis of Great Britnames of the New Church ministry was names of the New Church ministry was lost. The Convention adjourned.

CROP PROSPECTS.—The crop prospects of the country, as indicated by the accounts we gather from our exchanges, show only a fair average. The late rains on the scaboard have improved the appearance of the crops a good deal, but came too late to bring the hay crop up to war, called out very "General" diaguat! anything like an average. We also have reports of the appearance of rust on the reports of the appearance of rust on the wheat in eastern and middle Virginia, Maryland and in some sections of Delaware and Pennsylvania, and north and east the dry weather is very general, affecting all the growing crops. The potato bug has turned up in Illinois, Indiana and other of the western and northwestern States, and reports say it is "traveling east." At the south a cold and wet spring has interfored with cotton. wet spring has interfered with cotton planting, and, with other causes, that appear to be well founded, has caused quite an excitement in the markets for the great staple. Farmers everywhere com plain of a short hay crop, and in Callfornia, a great grain exporting state, the wheat crop is pronounced a partial failure. On the whole, from the accounts received, in which there must be considerable allowance made for the chronic character of the farmers for grumbling, the prospects are not very promising, and can scarcely be pronounced fair.

Durino the progress of a divorce case tried in Cincinnati a few days ago, some disclosures were made which must be highly interesting to any foolish young women who have allowed themselves to be led into correspondence with strangers through the introductory medium of newspaper advertisements. It appears that the defendent in this case, who was secused of infidelity and desertion, had advertised in the Waverley Magazine for tween seventeen and twenty years of age, with a view to matrimony," describing himself as a gentleman of ample fortune; and a large box of letters and photographs of young women who had answered his 29 advertisement was produced in the court room. These were examined with great interest by the jury, reporters, and others, and it is very probable that some of the letters may be published for the amusement of the public. It was shown that in one instance, at least, the rascal had in the least of the range of the contract an enroom. These were examined with great proceeded so far as to contract an enwoman ot respectable family who had answered his advertisement, although he had a wite and child living at the time. had a wife and child living at the time. How many more such cases there were cannot be known. If girls belonging to respectable families will be so inexcusably foolish as to enter into correspondence with men of whom they know nothing except from the description they give of themselves in advertisements, they must not expect sympathy if their pictures and their love letters come to light in such a manner as to arross them to in such a manner as to expose them to great mortification.

we are tree to admit, although there is no allusion made to the valorius deeds of "Colonel" (beg pardon) "General" George W. McCook, in the history of the military assirs of the late war, it is due to the gallant gendeman to say that he had some indirect connection with the Ohio military affairs during the rebellion. In the first year of the war avious to compute first year of the war, sexious to commits as many Democrats to the war as possible, and to divest it of a party or partisan character, Governor Dennison made Col. McCook, agent, with authority to purchase supplies for the military tenatures. chase supplies for the military department of the State, and to accompany the first quota of troops to Washington, in the character of Commissary, which position, from all accounts, was not filled to the satisfaction of the troops—for on arriving at Philadelphia on route for Washington, the troops were assigned quarters. the troops were assigned quarters in sheep sheds about six miles from the city, and no food was pro-vided, and as the weather was very disa-greeable, cold and wet, is rain storm pre-valling.
